External Systems

EasySlip

Extract data from money transfer slips.

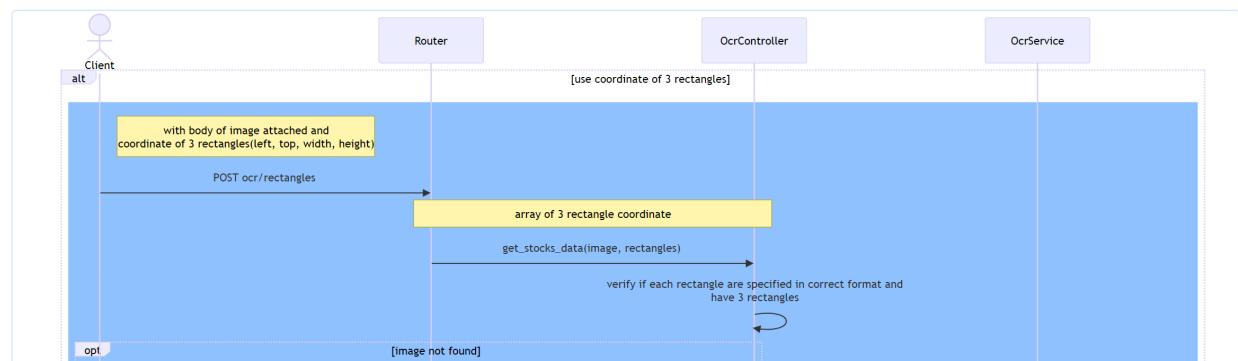

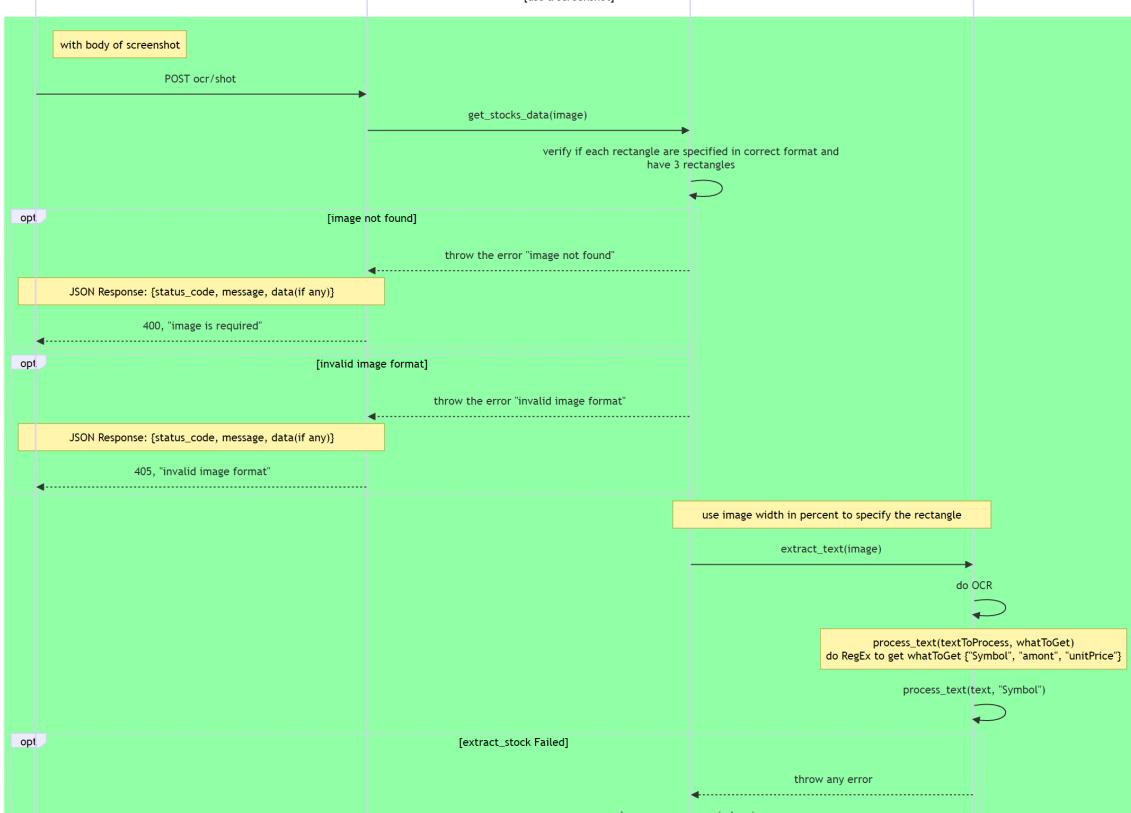

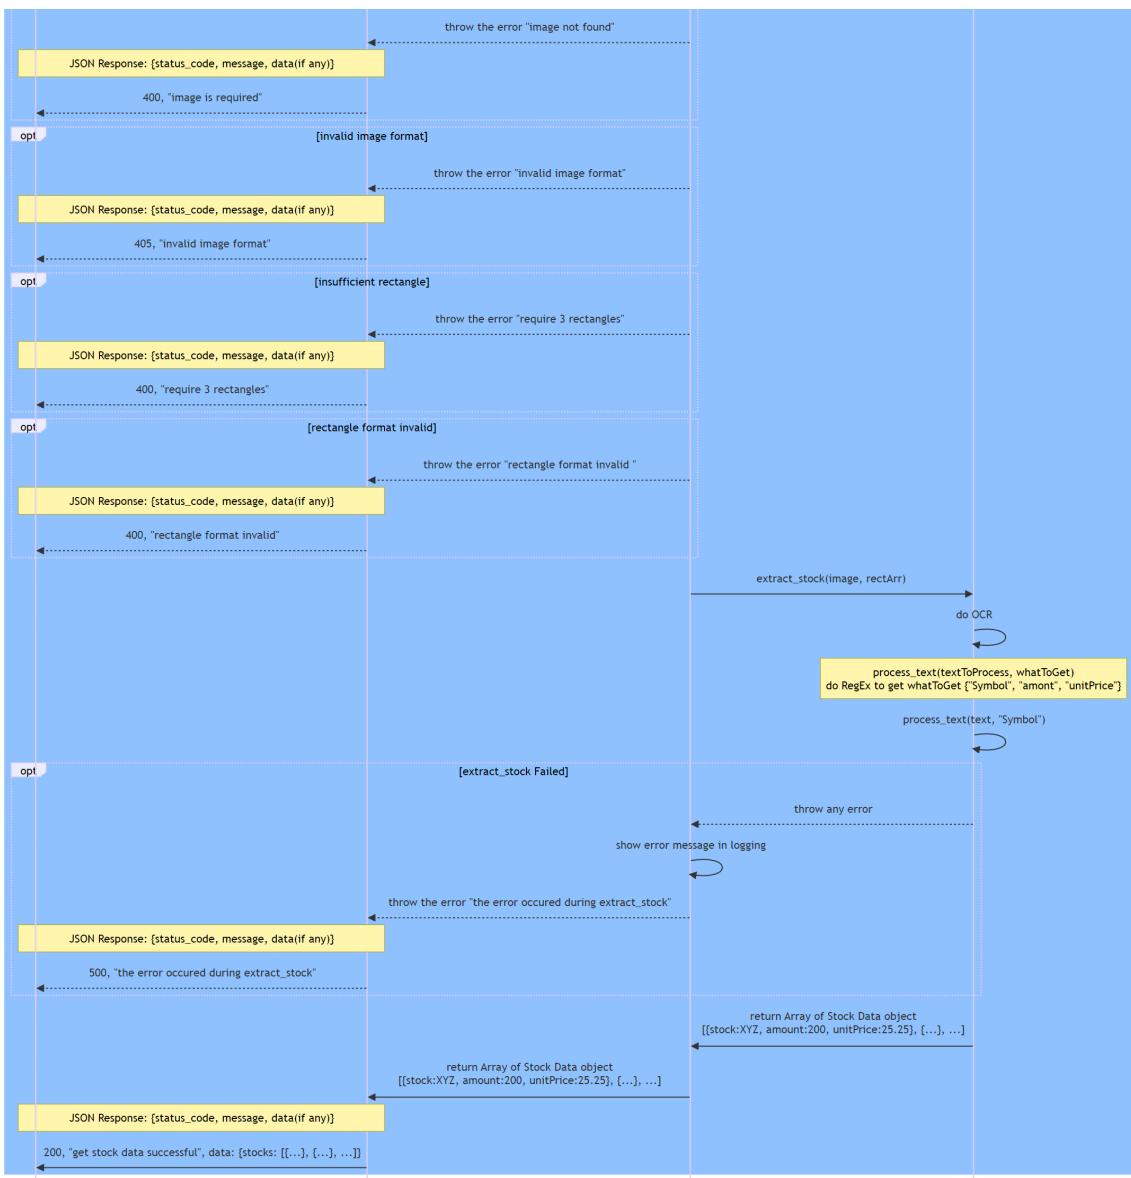

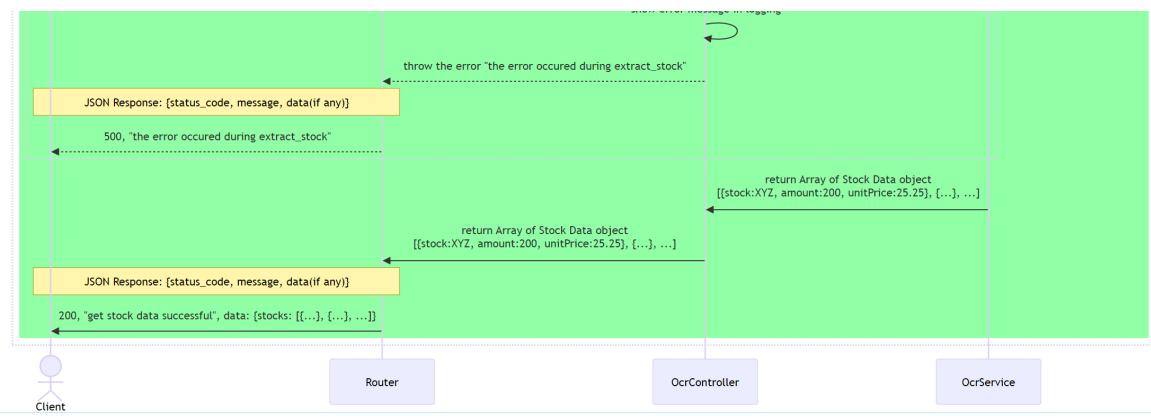

OCR (Optical Character Recognition)

Use screenshots to extract user stock data with 2 options.

1. use a screenshot with 3 rectangles coordinate data specified by client
2. use screenshot, the rectangle data doesn't required but it'll will use width percent automatically for all devices

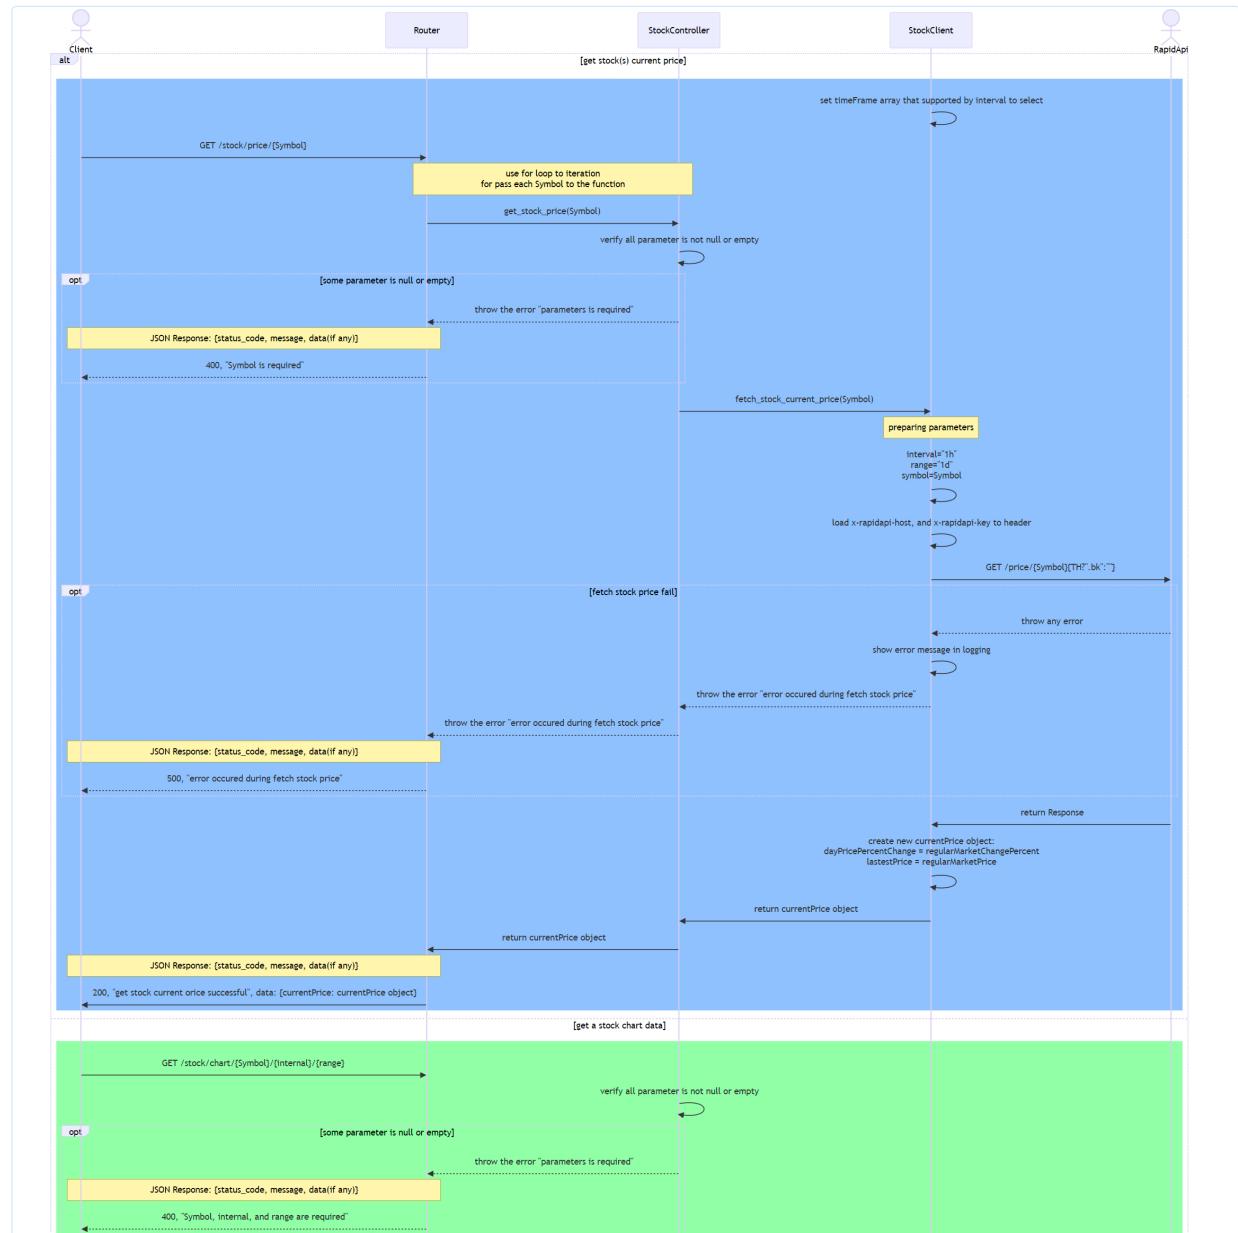

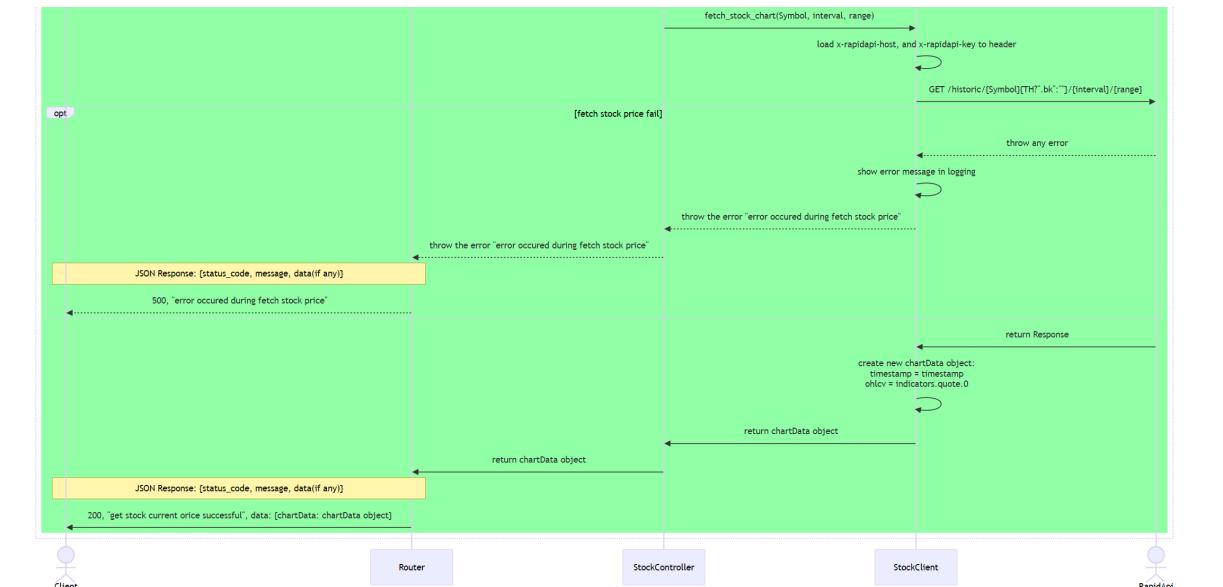

Stocks

Get stock prices.

1. retrieve stock current price and day price percent change
2. get a stock chart data
